[Kalispe18_21_13.xlsx](#)

Hi Ben My analysis shows completely different numbers and days of exceedances than Keta Waters. With the numbers looking better for the Tribes position, a little. I will check it Monday. Got to go backpacking!

I have read through the Keta reports and it is never stated that the heating effects at the Idaho border are magnified at the reservation border, but that seems to be the implication of Table 3's left columns.

Have a good weekend.

Hi Ben

Our computers and phones are out until sometime this morning, so I am working from home for now, but I have put this together. i will be in by noon or before.
